

**SS-1 Sound box shorting Cable**

This cable is made of imported 7N multi-strand copper wires twisted with 4N silver wires. Its terminal is 24K gilded banana plug and loudspeaker fork respectively and the external is wrapped with high quality thermal shrinkage pipes.

This cable is mainly used to replace the shorting sheet copper post between the binding posts for alt and woofer input of sound box, which adds more flavor to the expressive force of music and is specially designed for audiophiles seeking for high standard and high grade.
